## **BODY**

**5 mm thick tough steel plate 16 bends with round corner design Single joint body construction Inner lining of 2 mm CRC sheet Body thickness on all 5 sides Total thickness of 100 mm Includes double-duty protection Fire-resistant barrier material used Designed for enhanced safety and durability**

## **LOCKING MECHANISM**

**Two superior-quality dual-control, 10-lever locks made of stainless steel. Keys are provided in duplicate sets. Also protected by an automatic self-locking system.**

## **FIRE RESISTANT**

**Suitable thermal insulation is inserted between the door frame and the front flanges of the inner body to ensure protection against the flow of heat from the outer body to the inner body.**

## **DOOR**

**12 mm thick tough steel plate. Total thickness of various barrier materials in the door ranges from 130 mm to 150 mm.**
